EXPERIENCE

DAZN — Platform Engineer in DX

May 2019 - present

Improving DX for DAZN engineers. Built tools for simplifying complex front-end deployments, Improved internal CLI utility providing easier AWS account access, de/encryption, changelog management.

Built a CLI tool to migrate drone pipelines to github actions. Github repositories management and gathering repositories data for inner-source.

Currently implementing backstage for better documentation and services visibility in DAZN,

Previously was part of the payments team integrating PSP.

OPEN SOURCE CONTRIBUTION

[Awesome-jenkins-utils](#), [Developed Jenkins 1.x plugin for delivery pipeline](#), [Go CLI Fix bash flag completion](#)

And some other contributions you could find from my github history

SKILLS

Expertise in automation
CI/CD, shell scripting
Infrastructure automation
Front/Backend development
Team Collaboration

Technologies

AWS, Terraform,
Golang, Kubernetes, Helm
Jenkins, Groovy, Docker,
JavaScript NodeJS, ReactJS,
MongoDB, MySQL
Java, spring, hibernate,
junit

Things I ❤️

- [My Setup](#)
- Open Source

Things I Use

- Vim
- Tmux
- Webstorm
- Golang
- MacOS
